Dear Sławomir,

investing in education means investing in the future. We need the best of the best for education and care. That can only be achieved if the employees in schools and children's day care facilities experience a high appreciation of their work. It is therefore essential that they have the best working conditions and get a valuing payment.

That's why we would like to express our solidarity and empathy with our polish colleagues.

The members of Education International stand together.

Yours sincerely,

Udo Beckmann  
Federal Chairman
